Cleaning Validations

Whether you require cleaning validation services as part of qualification efforts for your facility/GMP suite or in response to a contamination event, WuXi AppTec can provide the expertise to develop a customized program to meet your needs.

EXPERIENCE

WuXi AppTec is the clear leader in this field with more than two decades of experience, including:

- Performance of a wide variety of studies for cleaning/disinfectant solutions and surfaces.
- Consulting and writing of cleaning validation protocols.
- Capabilities in developing custom virus titer or qPCR to a wide variety of adventitious agents.
- Additional expertise in mycoplasma and microbial cleaning validation programs.

PROGRAM FEATURES

- Investigational expertise to identify novel contaminants.
- Over 50 cell lines and 60 viruses to use as positive controls.
- Over 40 human and animal high titer viral stocks for use in coupon or solution studies.
- Experienced Ph.D.-level virologists with industry experience.
- Numerous high titer stocks for bacterial and mycoplasma cleaning validation studies also available.
